Innovations in the Design Process and Construction

current situation of the digitalisation in the construction industry, including BIM method, and its effects on architects' key activities in area of building design

→ how does the process of education respond to current requirements, how should the present university education be modified and how should the longlife education for practising architects be prepared?

→ what are architects' key activities affected by the digitalisation and BIM and how does standards of architects' scope of services have to be modified or extended?

→ in which documents are architects' key activities specified and how do these documents have to be modified or extended?

→ how could experiences in private studio be used in education process?

→ *BIM* → *CDE* → *EIR* → *BIM protocol* → *BEP*

Ing. Aleš Marek: Architect's role in the period of digitalisation of the construction industry

Supervisor: prof. Ing. Miloslav Pavlík, CSc., 9th ANNUAL CONFERENCE ON ARCHITECTURE AND URBANISM 2020, CONTEMPORARY RESEARCH DESPITE THE CRISIS, FA VUT BRNO
